ARCHIVO NARROW, LABELS AND SCALES

Archivo, running text

CLEAR SPACE AND SIZE TIERS

Keep clear space of one quarter of the mark's height on every side. Under 24 px use the favicon. Under 64 px use the clean SVGs; above 256 px the engraved tier (Phase 5) can take over.

DON'TS

- No glow, gradients, bevels, or drop shadows.
- No dark cards or dark backgrounds as a default. Light first; knockout only on photography or film.
- One orange moment per mark. Never recolour the ink, never add a second orange.
- Never redraw, stretch, re-space, or retype a mark. Pull the file.
- Never place a mark on a busy image without a paper plate behind it.
- The old glowing 8 (logo.webp) is retired everywhere.
